1. Introduction

Purpose

This **Aggregate File Creation Parameters** is intended to provide a clear set of rules and specifications for creating the CDE required aggregate file *School Information Form (SIF)* from records submitted by Local Education Agencies (LEAs). This document is under very strict version control and is to be updated and released simultaneously with new releases of the CSIS Data Dictionary, Code Tables, Validation Tables and File Formats.

Document Conventions

The title page and header of this document contain a version number in the form X.Y where:

X is the version number in sequence 1 through N

Y is the revision number in sequence .1 through .N

The first approved version of the document will be numbered 1.0

Each new version represents substantial change to the document (for example, adding or deleting work products or processes) and will be serially numbered to the left of the decimal (for example 2.0, 3.0,...) once it has been approved by CSIS management.

Minor revisions (that is, format or spelling) will retain the major version number and increment the revision number to the right of the decimal (for example 1.0, 1.1, 1.2,...).

Intended Audience and Reading Suggestions

The primary audience intended to read this document are the technical staff responsible for transitioning the CDE paper based aggregate reporting system to the new State Reporting and Records Transfer System (SRRTS). These are the CDE Program technicians and the programming staff writing the aggregation routines. The software quality assurance staff should also use this document to create test plans.

Readers should first familiarize themselves with the SRRTS System Architecture, SRRTS System Requirements Specification, SRRTS State Reporting Subsystem Architecture and Transmission File Formats prior to reading this document. The reader should be thoroughly familiar with the CSIS Data Dictionary and Code before reading this document.

References

All of the other documents referenced by this document can be found on the CSIS web site, in the document library. The web site address is <http://www.csis.k12.ca.us/library/index.html>. The following documents stored there will assist the reader in gaining a full understanding of the requirements and specifications for SRRTS:

2. Required CSIS Data Elements and Valid Codes

The following table contains all CSIS data elements (from *CSIS Data Dictionary version 4.1*) and related File formats (from *CSIS File Transmission Formats 2003-2004*) that are used in the creation of the CDE data elements specified in this document. Also included are valid codes for these CSIS data elements where codes are defined either in the *CSIS Data Dictionary version 4.1* or the *CSIS Data Dictionary Code Tables version 4.1*. The codes that are included are only those that are valid for creating CDE data elements in this document and may be a subset of all codes listed in the CSIS reference materials. NOTE: The element definitions in this document assume that the data to be aggregated include only valid data elements and valid codes.

3. Aggregation Parameters for CBEDS - School Information Form

Description

Physical File Name: SIF

Description: The SIF collects aggregate school level data about classified staff, student enrollment and institutional characteristics.

Related Hard Copy Form:

Form Name: School Information Form

Form Date: October 2003

Definitions used in this document:

“***CBEDS Information Day***” is defined, as Wednesday, October 1, 2003 (first Wednesday in October)

“***Prior year CBEDS Information Day***” is defined as Wednesday, October 2, 2002 (first Wednesday in October)

“***following year***” is defined as 2004

“***Student's Primary School of Enrollment***” If a student is concurrently enrolled in more than one school in the same district on CBEDS day (i.e., the student has more than one ENRA SE NULL record with an Enrollment Date (DE 05.01) on or before CBEDS Information Day and a Withdrawal Date (DE 05.06) blank or on or after CBEDS Information Day, and the CDS #s in those records are for two or more different schools in the district), only one of those enrollment records may have DE 05.18 (Enrollment Status) blank; all other records indicating concurrent enrollment must have DE 05.18 with a value of 1 (secondary enrollment). The record with DE 05.18 blank will be considered the student's "Primary" enrollment; the CDS# found in DE 05.03.03 in that record will be considered the student's "Primary School of Enrollment."

Section Selection Criteria

Each named Section Selection Criteria is used to filter the data for use in one or more of the Element Definitions.

Section Selection Criteria Name: SIF-Enroll

These are students who were enrolled on CBEDS Information Day. Students that are enrolled at more than one school are to be counted at their "Primary School of Enrollment". Each student is to be counted only once in only one school.

This section defines those elements that are used to describe a unique set of attributes for each SIF-Enroll. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.

Unique Elements List: Generate one SIF record for each unique set of these elements.

File Format	ID	Name	Criteria
INST GN NULL	14.03	Institution ID	KEY

Record Links: Join the following records together using the following Elements.

INST GN NULL, ENRA SE NULL	14.03 05.03.03	Institution ID School of Enrollment ID Number	
ENRA SE NULL, DEMO GN NULL, DEMO GN ET	01.02	CSIS Student Number	

Select only those records that meet the following criteria after they have been joined

INST GN NULL	14.03	Institution ID	Digits 8 through 14 <> '0000000'
ENRA SE NULL	05.03.03	School of Enrollment ID Number	Digits 8 through 14 <> '0000000'
ENRA SE NULL	05.01	Enrollment Date	On or before CBEDS Information Day
ENRA SE NULL	05.06	Withdrawal Date	On or after CBEDS Information Day or Blank
ENRA SE NULL	05.09	Dropout Indicator	= blank
ENRA SE NULL	05.18	Student Enrollment Status	= blank
DEMO GN NULL	05.11	High School Graduation Status	05.11 High School Graduation Status = 100 or blank OR ((05.11 High School Graduation Status = 110 or 120 or 170 or 190 or 210) AND 05.12 Graduation Date is on or after CBEDS Information Day))
DEMO GN NULL	05.12	Graduation Date	

Section Selection Criteria Name: SIF-CourseEnroll

These are 7th through 12th grade students who were enrolled or pre-enrolled in class(es) on CBEDS Information Day. Students that are enrolled at more than one school are selected and reported for each school. Each student is to be counted once at a school in a "Selected Course" area.

This section defines those elements that are used to describe a unique set of attributes for each SIF-CourseEnroll. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.

Unique Elements List: Generate one SIF record for each unique set of these elements.

File Format	ID	Name	Criteria

Section Selection Criteria Name: SIF-VocationalEdEnroll

These are students who were enrolled in a Vocational Education program or enrolled or pre-enrolled in a Vocational Education class on CBEDS Information Day. Students that are enrolled at more than one school are to be counted at their “primary school of enrollment”. Each student is to be counted only once in only one school.

This section defines those elements that are used to describe a unique set of attributes for each SIF-VocationalEdEnroll. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.

Unique Elements List: Generate one SIF record for each unique set of these elements.

Section Selection Criteria Name: SIF-Graduate

These students are those who have graduated since the prior year's CBEDS Information Day. Students that are enrolled at more than one school are to be counted at their "primary school of enrollment". Each student is to be counted only once at only one school. If more than one graduation date exists, use the most recent.

This section defines those elements that are used to describe a unique set of attributes for each SIF-Graduate. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.

Section Selection Criteria Name: SIF-Dropout

These are students who meet the criteria for a dropout as defined in the CSIS Data Dictionary. Each student is to be counted once at their “primary school of enrollment”. NOTE: If multiple records exist, first select the one with the highest grade-level, then if there are still multiple records, select the one with the most recent enrollment date.

This section defines those elements that are used to describe a unique set of attributes for each SIF-Dropout. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.

Unique Elements List: Generate one SIF record for each unique set of these elements.

Section Selection Criteria Name: SIF-ClassifiedStaff

These are classified staff (as specified below) who were employed on CBEDS Information Day. If the “paraprofessional” or “office/clerical” staff serve at more than one school, they should be counted at the school where they serve a majority of their time and all time worked at all schools should be considered when determining if they are to be counted as “full-time” or “part-time”. If the “other classified” staff serve at more than one school, they should NOT be reported here but instead on the CDIF. Each staff is to be counted once at a school.

Classified staff are to be counted only once in one job category. For a staff person that reports in more than one job classification, use the following rules. Assign the staff to one of the categories among “paraprofessional”, “clerical”, or “other” based upon the largest percentage of time spent in a category. If there is no classification with a majority, the lowest code reported for *13.03 Job Classification* should be used to determine the category. All of the classified staff time in all classified staff categories should then be attributed to the selected category. For example if a staff reports 35% in “paraprofessional” and 65% in “clerical”, the staff should be reported as “clerical” with 100% time.

This section defines those elements that are used to describe a unique set of attributes for each SIF-ClassifiedStaff. Each element is defined as to its source (what CSIS record format it comes from) and how it is used. Some elements are used to define uniqueness while others are used to join together the records in which they are found.
